

Operating Charter — Soul In PsyAbstract LLC

Version: 1.0

Date: 2026-06-27

Mission

Build AI infrastructure that empowers neurodivergent creators — ADHD, BPD, autism spectrum — to create, ship, and thrive without the cognitive overhead that neurotypical systems assume.

Core Principles

1. **Neurodivergence-first** — all products are designed for neurodivergent brains, not adapted from neurotypical defaults.
 2. **Transparency** — public governance, open tokenomics, verifiable on-chain data.
 3. **Creator sovereignty** — artists and builders own their work and data.
 4. **Forensic integrity** — every canonical system change has a hash, timestamp, and audit trail.
 5. **No UI overhead** — SIPA Protocol Zero: prefer API/CLI over reload-heavy UIs wherever technically sound.
