КЛЮЧЕВЫЕ ВЫВОДЫ

13 секций (А-М) — полная форма за один день. В V9: DAY_BOOT имеет 7 артефактов (DAY_LOG + HEADSHOT + TIMELINE + RUNTIME_STATUS + INVENTORY + MANIFEST + AUDIT). Та же информация, другая структура.

“NEXT ACTION (ONE ONLY)” — запрет множественного вывода в PLANNING. В V9: “ONE RESULT = ONE RESPONSE” — Правило.

“SELF-AUDIT” как обязательный раздел формы. В V9: AUDIT__LEGAL_FIXATIONS.log + GUARDIAN SELF-AUDIT. Самоаудит = встроен в протокол с первого дня.

“SINCE (last check-in timestamp)” — continuity tracking. В V9: BOOT__YYYY-MM-DD__HH-MM-SS = точный timestamp каждой фиксации.
