Liquidity

- Primary DEX: **Aerodrome** on Base mainnet
 - LP positions: 2 positions (as of June 2026)
 - LP is public and verifiable on-chain
-

Token Utility

SIPA token is a **utility and governance token**:

Use Case	Description
Platform access	Premium tiers on SIPA OS apps
Governance votes	Community proposals (future)
Creator rewards	Art sales and content milestones
AI credits	Pay-per-use for SIPA AI services

SIPA Token is NOT: - A security or investment contract - A share of LLC equity - A promise of profit or return

Governance Rights (Future)

After September 2026 unlock, token holders will gain proposal rights for: - Treasury fund allocation - New feature priorities - Partnership approvals

Governance mechanism will be announced separately.

Transparency

All token movements and LP activity are publicly verifiable on Base mainnet.

Treasury multisig details will be published when governance mechanism activates.

SIPA Token does not constitute an offer of securities. This is a utility token for the SIPA OS ecosystem.
